

FEWER JULY MOVEMENTS FOR MAJORITY OF ANSPs

➤ IFR MOVEMENTS: JULY 2009 VS. JULY 2008

The impact of the economic crisis continued into July as the majority of ANSPs controlled fewer movements than in the corresponding period last year. However, a handful of ANSPs experienced a slight increase over last year.

ISAVIA remains one of the worst hit ANSPs, reporting a 12.72% decrease. However this is a marked improvement on the near 40% drop in seen for June 2009 vs. June 2008 (see page 10).

NATA controlled just over 12% more movements, continuing a positive trend seen in previous months.
